MALL PLANS

Plans for the Mall building to be erected by Ralph Graffigna, et al, was presented for Council consideration. The owners and developers would like to construct the building with windows on the west side which would overlook the City's parking lot. The building would be placed three feet from the west property line. They also plan to have a service entrance at the southwest corner of the building. The owners are willing to enter into an agreement with the City whereby they would block up the windows on the west end of their building to provide a four-hour fire wall in compliance with Building Code regulations in the event a building or structure were to be erected on the adjacent parking lot site. After discussion of the plans and the proposed agreement, it was moved by Councilman Dow, Brown second, that the plans as presented be approved subject to an agreement drawn up by the City Attorney, which would be recorded, whereby the west wall of the building would have to be made four-hour fire resistant in the event a building is erected on the adjacent property. The motion was approved, with Councilman Culbertson abstaining because of direct interest. Final plans for the Mall are to be presented to the Council at a later date and an agreement is to be worked out in regard to deliveries to the stores along the Mall.
